Walking the Pleor.

When a business man gets to the point where he cannot sleep at night, where he is so shattered of nerve that it is torture to even remain in his bed, and he has to get up and pace the floor—it is time for that man to bring himself up with a round turn. If he does not, it means nervous prostration and mental, if not physical, death.

For a man who gets into this condition there is a remedy that will brace him up, put him on his feet and make a man of him again. It is Dr. Pierce's Golden Medical Discovery. It goes to the bottom of things. It scarches out the first cause. When a man is in this condition you can put your finger on one of two spots and hit that first cause—the stomach or the liver or both. This great medicine sicts directly on these spots. It promptly transforms a weak stomach into a healthy one. It facilitates the flow of digestive juices and makes digestion and assimilation perfect. It gives a man an appetite like a boy's. It invigorates the liver. It fills the blood with the life-giving elements of the food, and makes it pure, rich, red and plentiful. The blood is the life current, and when it is filled with the elements that build new and healthy tissues, it does not take long to make a man well and strong. It builds firm, muscular flesh tissues and strong and steady nerve fibers. It puts new life, vigor and vitality into every atom and organ of the body. It cures nervous exhaustion and prostration Nothing "just as good" can be found at medicine stores.

"It had sufficed lor eleven years and spent a great deal of morey for doctors and medicine, but did not get relief. Then I tried four bottles of the "Golden Medical Discovery" and improved greatly. I sent for he more and now aim glad to tail everyone that I am in good health."

CONVINCING REASONS

These Bargains Will Win your Trade

Heretofore it has not been our practice to give an extended mention to the bargains we are presenting—just a brief mention has sufficed, as it was found that our customers have proved the best advertisement we could get. But at the present time we are offering so many exceptional bargains and this sale will last for such a brief period (30 DAYS) that we find it necessary to use this means of reaching the buying public. Now the object of sacrificing the goods enumerated below is to make room for our Spring and Summer stock, which will soon arrive. Ours is a first-class store and the largest of its kind in Nevada. It is the aim of all first-class houses to carry up-to-date goods; hence this CLEARANCE SALE. We said we would give Convincing reasons for your trade. Have we succeeded yet? If not, READ:

NEVADA'S MINING FUTURE

The causes at work for the future development of the State are healthy. There is not anything superficial about them, because they are real, as we understand, business that will give remuneration to capital invested. The mining industries in the State as now operated are of a type that give indi catious that will lead to permanent business in mining. The early efforts at mining, except upon the Cometock, were impulsive and unstable. The interest in mining centered at Mount Davidson, on the Comstock lode, which continued for years to be overshadowing in such a way that all tive to labor they move under the lesser lodes and mining developments | flash light of prosperity that shows the were regarded as unworthy of the care or notice of mining men, who in those days were not so well informed re- py in the possession of comfort and a specting natural development as many of them are at present upon lode structure and general indications of mineral deposite, which will return a profit upon investments made to explore and unfold the veins that give outward indications of wealth.

It may not be received as consistent with the order of things when we say Kearns of the Sunset company is in that the State's natural wealth bas town. been one of the chief causes that has retarded development within the State. The large and extensive natural development of the Comstock, like all things that are out of the order of usual example, became absorbing, and the attention of the mining world was directed to its phenomenal wealth and eize, as the attention of mankind was directed and largely controlled by the phenomenal genius of a Caesar or a

When those who came in the early time to the State to procure fortunes in a short time could not find a Comstock on every hill, they went away in disgust that flowed out wherever they went, giving the State a name that has become equal to the commercial world for all manner of meanness, and more of nature in its zephyrs and borned toade.

The early conditions there were upon Nevada, like Cas-ar and Napoleon, les and doctors could give her no help have had their time and public attenwonderful wealth of the Comstock, remove as speedily as it is possible to thouble of the Throat, Chest or Lungs. main when our work is fluished may at S. Our chief reason for believing the movement at this time to be permanent is that the causes that have been active against mining development have been largely removed, thief among which cree dissolving the marriage of John was the ignorance of those who came to outer into mining industries in the early bistory of the quartz mining in the State.

The time of the all absorbing power

in the State is not in the fature but in the past. When we mention the Comstock and its former attractions in mining effort we do not wish to be understood that it is our judgment that the Comstock is no more worthy of consideration, as we believe there is a very great future for that lode.

Our incaning is that knowledge in mining is so much superior to the learning that was applied to quartz mining thirty-flve years ago that the Comstock, or a mine of equal wealth, would not now demand the interest of the world in mining which the Comstock received and retained for years.

law the efforts of mining men will be more general in the future and from that cause the general mineral wealth of the State will receive attention that will result to the state in wealth that will place, as a whole, the wealth of the Comstock in the shade when compaired in the light of general prosperity from muning industries.

The general conviction +bere is that Nevada is rich in minerals is becoming more active, and as it becomes active, confidence is inspired and it will continus to be made active till the State will get out of the rut it has been in, more particularly since organized capital sent silver to hades where it has burried the wrecked fortunes of mankind for ages.

The people in the near fature will be upon a plane above the position they have occupied in business for many years if present indications tell the truth which we believe upon all principles in natural law they do.

When the people are doing vell and are receiving prices that are renuneraway to a future that gives confidence to the affairs of life and they are hapdollar to spare to go to the fair.

Robbed the Grave.

A startling incident, of which Mr. John Oliver of Philadelphia, was the subject, is narrated by him as follows: "I was in the most dreadful condition. growing weaker day by day. Three physicans had given me up. Fortunately, a filead advised trying 'Electric Bitters;' and to my great joy and surputation. D. B Johnston of Rich- price, the first bottle made a decided mond, Ind., has been troubled with improvement, I continued their use that atiment since 1862. A Northern Neighbor.

The ill-informed writer of this squib was once of the opinion that Modoc county is composed chiefly of lava and bad ..june.

He discovered to-day that he was mistaken. The Alturas New Era has issued a special edition descriptive of "Modoc, the land of milk and boney." The paper backs up its article's title by giving facts and figures sufficient to prove its case in the absence of opposing testimony.

Voice Culture.

The fact that F. P. Dann's card annonnaing that he will give instruction in voice oulture appears in the Jouanal for the first time, does not argue that he is a beginner in the profession.

Mr. Dann has been instructing a class for some time and with great success. He builds the voice from the ground up, working according to the best established scientific principles.

The county fathers concluded their work of passing upon bills yesterday. General Turrittin, C. Becker and Henry Riter, the committee appointed to appraise the value of the old fire department house, reported it worth will be received to-lay.

The matter of approving the map of Evans' addition to Reno was referred te the District Attorney.

Three bids for supplying a fire alarm system were received. The Gamewell Company bid for \$8,825. The U. S. Fire and Police Telegraph Company's figure was \$3,500. O J. Smith offered to put in a system according to specifications for \$3,250. The first and last named made propositions to lease their systeme.

An are light was directed to be placed on Center street.

The new engine house was rented

for \$57 a month. To-day the board will consider a school tax levy and probably act upon the fire alarm matter.
